

Preference Assessment: Paired Choice 6

Student name: _____ Completed by: _____ Date: _____

1. Write in the items to test (based on a Preference / Reinforcer Survey) in the "Summary of Tested Stimuli" table.
2. Conduct "Preference Assessment: Paired Choice 6" by offering pairs of items to the student during two sessions. (Back to back, or Session 1 in the AM and Session 2 in the PM, or do them on consecutive days)
 - a. Present two items simultaneously on the left and right of the student.
 - b. Say "Take one", or "Choose one", or "Which do you want?"
 - c. Block any attempts to get both items. If the student tries to get both, remove the items, present again. (You can present them further apart, so the student can only access one at a time)
 - d. If the student selects an item within 5 seconds, allow access to the reinforcer (if possible) for 30 seconds and record the choice made by circling the number.
 - e. If the student does not make a choice within 5 seconds, remove the items and record No Response by circling NR.
3. Continue to present the items until the session is complete.
4. Record results in the "Summary of Tested Stimuli" table
5. Record the rank of the items (Most Preferred=1st to Least Preferred=6th)

Summary of Tested Stimuli					
Item	Item Name	# of times Selected	# of times available	Total selection %	Rank 1 st -> 6 th
1			10		
2			10		
3			10		
4			10		
5			10		
6			10		

Session 1			
Staff:		Date:	
Trial	Left	Right	No Response
1	1	2	NR
2	3	2	NR
3	2	6	NR
4	1	3	NR
5	6	5	NR
6	3	6	NR
7	2	3	NR
8	5	1	NR
9	4	6	NR
