Saeed Moaveni Bio

Dr. Moaveni is a distinguished research fellow at the Center for the School of the Future (CSF) at Utah State University (USU) and is an emeritus professor of mechanical engineering at Minnesota State University. He is the former dean of the David Crawford School of Engineering at Norwich University – the oldest private engineering school in the U.S., founded in 1819 – and the former dean of the Smith College of Engineering and Technology at Utah Valley University (UVU) – one of the newest engineering colleges in the nation. His past positions have also included faculty appointments at Syracuse University and the University of South Carolina. He has been a licensed professional engineer (P.E.) in the State of New York since 1991.

An area of Dr. Moaveni's research interests includes engineering education. He has authored numerous articles in STEM journals and three popular books that have been translated into other languages including traditional Chinese, simplified Chinese, Korean, Turkish, Portuguese, and Farsi. For three decades, he has served as a reviewer and a panelist for the National Science Foundation and currently is collaborating with the Center for the School of the Future, the College of Engineering, and the School of Computing at USU to utilize Artificial Intelligence to advance personalized learning to make K-12 education more engaging and effective.
