# VPN Connection for Chromebook

Step 1.

Open the Cisco AnyConnect VPN application.

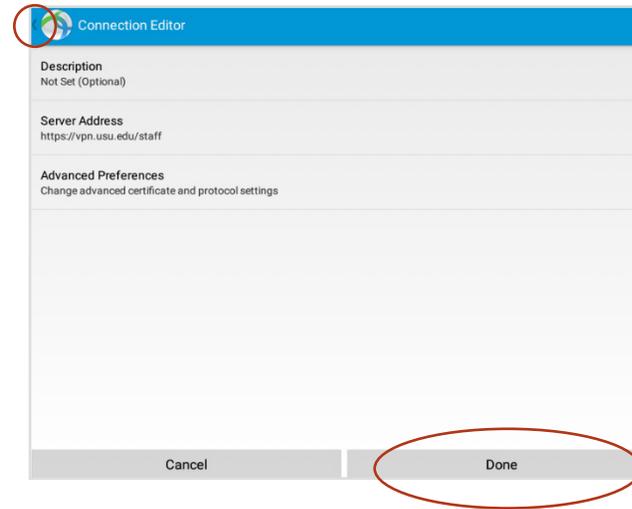

Step 2.

Click *Connections*.

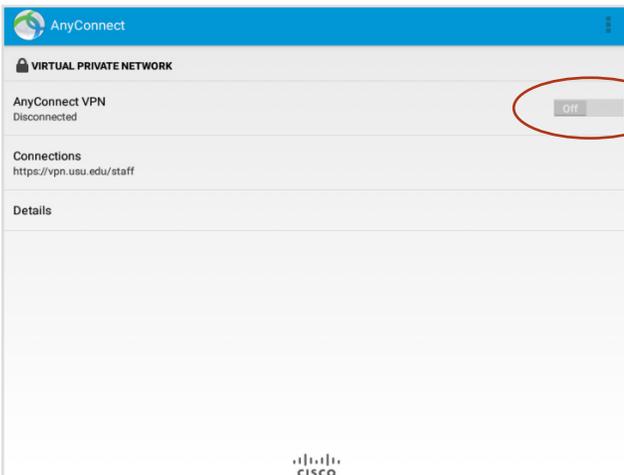

Step 3.

Click *Add New VPN Connection*.

Step 4.

Enter the Server Address: *https://vpn.usu.edu/staff*. Click *OK*.

Step 5.

Click *Done*.
Then click the back arrow next to the logo and Connection Editor.
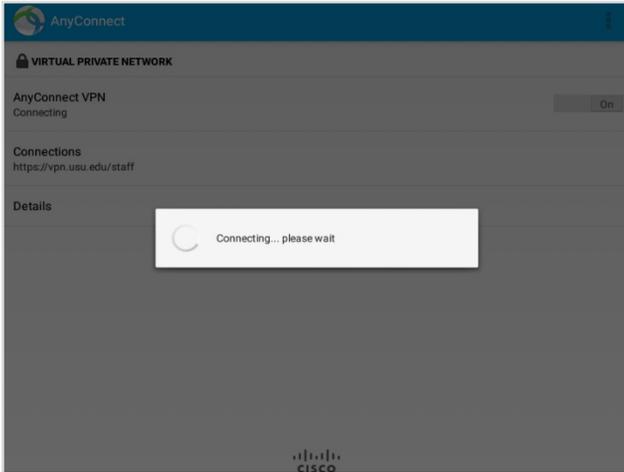

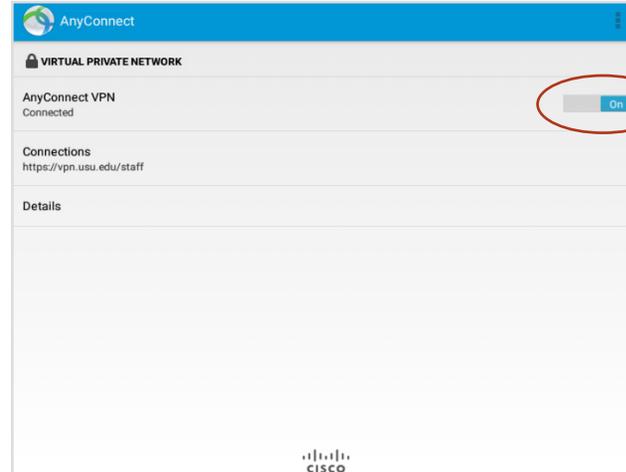

Step 6.

Toggle the Off to On.

Step 7.

Enter your A# as the Username, your university strong password as the Password, and push as the Second Password. This will send you a Duo Push.

Click *Connect*.

Step 8.

Wait for the connection.

Step 9.

When it is toggled On, you are connected to the VPN.
