

POLICY: Summer Student Teaching
ADOPTION DATE: February 25, 1994

Generally, no undergraduate courses, practica or student teaching are available in the summer since the department is not funded for undergraduate summer teaching. Further, it is difficult to find placements in the summer and to provide supervision. We have, in exceptional circumstances, arranged summer student teaching for a few students. When that is possible at all, the following conditions must be met:

1. There has to be an appropriate placement available as determined by faculty.
2. There must be funds available from the university to pay a faculty member to supervise.

In addition, the student must:

1. Have completed all graduation and/or licensure requirements except student teaching
2. Have a cumulative GPA of 3.5 (for second B.S. or masters students GPA requirement is based on past bachelors classes only)
3. Receive an A or A- in all practica
4. Be recommended by each practicum supervisor

* The policy does not apply to early childhood or severe students enrolled in a partial student teaching option.
