

Color Symbol Image

Activity: This is a great strategy to teach and practice image analysis when viewing primary and secondary sources, such as artwork, broadsides, photographs, and other visual media. You can use this strategy with a single source or to multiple sources. The graphic organizer below is helpful to organize information.

Source	COLOR <i>What colors do you see? How do the colors represent an idea or suggest a wonder/question?</i>	SYMBOL <i>What symbols do you see? How do the symbols represent an idea or suggest a wonder/question?</i>	IMAGE <i>Based on what you identified and inferred, how does this image depict an idea or suggest a wonder/question?</i>
